

fast. FastER. FASTEST. with the SMp

Have you been doing secret miles?

That's what you will be asked
as you wait at the finish line
for your competitors to finish.

"I cheated. I used the SMp."

We are a new bicycle manufacturing company in Pasadena, California with ONE product. Fortunately, that product is the SMp—side mount pedal and it will soon be the fastest selling product in the bike world achieving faster times for competitive riders, reducing fatigue, and improving power transfer from the rider to the bike.

You may have heard of Steve Lubanski's patented side mount pedal from your friends, *Open Road Bicycle Shop, Interbike, Pasadena Star-News, Houston Chronicle, BikeBiz.com, and Adventure Cyclist.*

The cycling world has been waiting for the SMp for 100 years. We think the SMp will change cycling. We want to help you, the cyclist, achieve your best.

Give the SMp a spin.

There's Power in the Pedal![™]
